Options for large mind maps

Reduce Dimensions

On the layout
- Reduce spacing
- Change direction
  - if radial, to the right and vice versa.
  - On the palette
- Change the sequence of main topics — Drag
- Radial MM: change the distribution rule — MM popup, Properties...

In the content
- Text
  - Break into one or more lines — with Ctrl-Enter
  - Increase lines — palette or Alt-+
  - *See text reduction*
- Images
  - Remove
  - Reduce the size
  - Exchange for minors with similar meaning

In formatting
- **Topic** — Reduce Topic margins — Ctrl-Shift-E
- **Topic** — Reduce the thickness of edges — palette
- **Topic** — Remove borders — palette
- **Topic** — Reduce font size
  - of everything
  - of a level
  - Control-[or palette
- Topic — Change fonts
  - Remove bold
  - eg Arial -> Arial Narrow

In print
- Reduce Scale — 70%
- Reduce margins — Limit: Printer printable area
- Change page orientation — Portrait for landscape and vice-versa
- Print in multiple pages — Requires cutting and assembly
- Get an A3 printer

Create views

Steps
- 1) Contract some topics and print/image
- 2) Expand those, contract the rest and print/image

Controls
- Contract up to — Control-Alt-Up arrow
- Contract a level — Control-Up arrow
- Expand a level — Control-Down arrow
- Expand all — Control-Alt-Down Arrow
- Display Up Level — Alt + level
- Focus topic — F3

Standard views
- Summary
- Focus on topic

EasyMapper 2.0: persistent views

Physical partitioning
- Extract a subtree as a new mind map
- EasyMapper: Automatic — right click on topic/Extract

Logical partitioning
- When part of the content is independent
- Example
  - mind map of pizza dough
  - mind maps of pizza toppings

In image generation
- Lower zoom
  - 90% ok
  - be less, increase minor fonts
- Generate SVG image — does not lose resolution
- Cut
  - sacrifices part of the context
  - in another program

Not at all!
- Generate Single Page PDF — Export buttons on the toolbar
